

Time is Money | Save Both | Make Both

# NTProLite

*"Managing People. Connecting People."*

Widely recognised as one of the leading systems for workforce management solutions, North Time Pro products are synonymous with reliability, increased functionality and continuous innovation.

# Software Features

## North Time Pro Lite

Widely recognised as one of the leading systems for workforce management solutions, North Time Pro products are synonymous with reliability, increased functionality and continuous innovation. NTPro Lite is limited to 50 employees and contains the features of an established time management solution.

## Attendance Management

North Time Pro Lite attendance provides you with the tools to schedule where your workforce should be and how long they should be working. It allows you to plan for each department within the company, selecting employees with the relevant tasks for the job in hand. An increasing number of businesses are choosing flexitime, rotational shifts and annualised hours as their preferred working method.

## Absence Management

Tracking holiday entitlement, managing holiday schedules and monitoring absenteeism are the three essential factors that make up North Time Pro Lite absence management.

It is now possible to create absence entitlement policies that define the number of days holiday based on years service from any date. You can specify the amount of time that may be carried forward from one year to the next and even award entitlement credits for additional holidays. All absence management amendments must be approved and finalised for secure auditing.

## Reports

The North Time Pro Lite report module provides over 160 clear and concise user editable reports, forms and graphs as standard. The North Time Pro Lite export module provides an easy way to pass raw North Time Pro data to an external application such as Microsoft Excel for further data mining or to simply develop an ad-hoc report.

## Access Control

North Time Pro Lite access control brings you indispensable security, protecting that which is most important - your people and your property.

Simple to use but extremely effective, North Time Pro Lite access is now installed at more than one thousand companies across the UK. Designed to integrate seamlessly with North Time Pro Lite personnel ensures that when a contractor completes a job or when an individual leaves employment, they will not be able to access your building.

North Time Pro Lite access can be used to control doors, barriers and gates.

## Payroll Integration (optional)

North Time Pro Lite includes an authorised, integrated multi-company Payroll interface option that eliminates the need for third party 'Payroll interfacing software'.

Please note that for companies requiring 'bespoke' software links, we are able to offer a unique development service utilising the North Time Pro Lite scripting engine.

Every company has a deadline for running the payroll yet how many times has the deadline had to be delayed due to line-managers failing to approve overtime?

North Time Pro Lite includes a 'payroll reminder' to-do list item. Set by the North Time Pro administrator, this feature provides an hourly countdown reminder of the oncoming payroll deadline!

## Mobile Smartphone Clocking App (optional)

North Time Pro Lite provides an extremely effective method of tracking remote workers by utilising mobile based technology.

With the recent surge in mobile device usage over recent years, it's safe to say that most people will have a mobile phone capable of running apps. We've taken this in mind when we designed the mobile worker. Employees can download an app directly from the iOS (app store) or Android (play store) for free and connect directly on to your North Time Pro Lite. From here, employees are able to 'clock in' remotely and managers view where these bookings were made.

## Hardware Options

North Time Pro Lite can operate with a wide range of clocking terminals. These range from biometric solutions to proximity based cards or key fobs. A selection of the terminal options are included below.

### NTP101TC

NTP101TC is Time & Attendance Terminal and can come with SilkID fingerprint reader, face recognition and RFID card functions. With the new SilkID fingerprint reader, the operation remains stable under strong light source and high preciseness of verification of wet and rough fingers. With latest facial algorithm and the innovation features, NTP101TC is bringing you a whole new experience.

### NTP705

NTP705 is a new generation of RFID terminals for Time Attendance applications with colour and touch display. NTP705 is a 13.56 MHz proximity attendance management terminal incorporated with 3" TFT LCD. The colour display and touch screen operation offers a user-friendly and easy menu management. The integrated push sdk protocol allows the terminal to communicate in real time to attendance management software through Ethernet, Wifi or external POE.

### NTPF22

NTPF22 is one of the smallest Access Control terminals on the market. With 16 cm high by 8 wide, the NTPF22 is the perfect solution for installations of maximum exigency in confined spaces.

With a minimalist design in white or black colours, the NTPF22 incorporates the new BioD algorithm that offers superior performance in fingerprint identification. It has Wi-Fi wireless communication as well as access control interfaces for connecting external readers, offering full connectivity in any environment.

### NTP922

The NTP922 is specifically designed for off-site time management, such as construction sites, logistic industries, large farms, and the mining industry. The terminal comes with backup battery as standard and uses a mobile phone data sim card to send attendance data back to the software when no network infrastructure is available onsite. Top handle with rubber coating enables users to carry easily.

**A selection of customers of North Time Pro  
time management solutions include:**

First of all I would like to thank the team at NTD for their fantastic service, nothing has been too much trouble. With 180 employees in both Northern and Southern Ireland spread over seven different sites we required a networked time and attendance system that would link seamlessly into our payroll system, as well as allowing us to manage shift patterns, holidays and absences.

From the demonstration and installation of the biometric hand scanners right through to the bespoke reports we required NTD have delivered on time and on budget.

The system has dramatically decreased the time spent by our managers and accounts staff carrying out their administration duties, allowing them more time to concentrate on other parts of the business.

NTDs system has far exceeded our expectations, it is easy and intuitive to use and can be tailored to your specific requirements. The reporting features have been incredibly useful.

In reality we should have installed a time and attendance system years ago as we could not live without it now.
