Eco-friendly ID Card Printing

Act Responsible. Think Sustainable!

Every product we use has an environmental footprint and could end up in landfill. With our help, you can make a positive change

As part of NTD's ongoing commitment to the environment, our rPET products help reduce landfill waste and the amount of new plastic being produced.

In addition to the biodegradable holders and cards, we can now offer Screen Print and Dye Sub Personalised Lanyards using rPET fabric made from recycled plastic bottles.

They last longer than traditional polyester lanyards too, while lowering chemical and energy use in the production process it is a further boost for the environment.
